Available for  
Windows and  
Mac OS X platforms.

# eyeBeam™

"Xten softphones represent some of the best technology in IP Telephony today, combining our headsets and Xten's softphones offers consumers, road-warriors and enterprise users excellent sound quality, comfort and convenience for IP-based communications."

Joe McGrogan, Plantronics  
Product Marketing Manager

## Voice, Video & IM Softphone

### eyeBeam -

Xten's flagship application.

Xten's long awaited Video SIP softphone application is now available, supporting open standards for both Voice and Video over IP.

Co-branded and private labeled solutions are available for cable operators, carriers and various service providers. Xten's Rapid Branding process reduces time to market and expense allowing service providers to concentrate on their business of providing service instead of developing software.

Branded solutions not enough? Total control of eyeBeam is available via the eyeBeam SDK.

The eyeBeam menu uses the "tree" design for easier navigation.

The user sees all controls and settings at the same time. At any given moment the user always knows where they are.

### Telephony Features:

- Acoustic Echo Cancellation [AEC]
- Message Waiting Indicator
- Audio Tuning Wizard
- Touch-tones
- [RFC 2833, inband, out of band INFO DTMF]
